MULTI

Combine up to 5 indoor units

Haierhvac.eu

Features

Residential MultiSplit Inverter

Introduction

Haier's Multi Split system enables you to experience climate comfort in every room.

A Multi system allows up to 5 indoor units to operate from a single outdoor unit, thereby reducing installation space and costs. All indoor units can be controlled independently and does not need to be installed at the same time, the system can be future proofed to allow up to 5 indoor units to one outdoor unit.

Haier's range of indoor units caters for a wide variety of applications, this includes, wall mounted, concealed ceiling, cassettes and floor standing units. These units are available in range of capacities which enables you to accurately size the system according to the needs of the room.

Easy Installation

Haier

Features

SELF-CLEAN

Freezes the evaporator with moisture in the air and removes dirt during the defrost process, ensuring healthy air output. Our Self Clean technology is the first of its kind to integrate the self-cleaning function of both the evaporator and the condenser.

HON WI-FI

Enables you to take control of all the Haier group appliances in your Smart Home from a single app on your smartphone or tablet. The hOn app allows you to manage all the basic functions and much more.

UVC PRO

Inhibits the reproduction of bacteria, by breaking down hydron and oxygen molecule and generates ionic group which inhibits bacteria and sterilises virus after contacting. The module was independently tested by Texcell and inhibits SARS-CoV-2, with an efficiency up to 99.998% in 1 hour (Expert).

EASY INSTALLATION

Installation is simplified, with larger workspaces and easy disassembly and maintenance. Pipes and cables can be connected easily thanks to a removable bottom panel.

SILENCE

Optimised design of fan's air ducts, and motors to be able to deliver cooler, more comfortable air with a low noise level for you to enjoy your indoor space.

ECO SENSOR

Detects the condition of air and people's movement in real time, adjusting the operating mode of the air conditioner to improve energy efficiency and optimise the users experience. It uses a double area detection with a maximum angle of 120 degrees and a distance of 8m.
